 France

Skills

- **Langages & Frontend** : JavaScript, TypeScript, React, Next.js, Angular ,Tailwind CSS, HTML, CSS
- **Backend & APIs** : Node.js (Express, NestJS), FastAPI, SpringBoot, .NET
- **Data & IA** : Python, Pandas, NumPy, Scikit-learn, Machine Learning, LLM / Embeddings, ETL, ELT, Web Scraping
- **Bases de données & Recherche** : PostgreSQL, MySQL, MongoDB, Typesense
- **DevOps & Qualité** : Docker, CI/CD (GitHub, GitLab CI), Kubernetes, Tests (Jest), Agile / Scrum

Experience

Full-Stack Developer Apprenticeship	Mondeimaginaire	21 Rue Gambetta, 78800 Houilles	10.2024/12-2025
• AI Innovation & Research (React.js / Typesense): Designed a high-performance semantic search engine. Used LLMs to generate vector embeddings, enabling superior contextual relevance compared to traditional search. • Internal Tools & Dashboard: Fully developed a centralized Admin Dashboard, providing real-time KPI visualization and facilitating strategic decision-making. • Backend Development (Symfony / PrestaShop): Created complex modules (Payments, Inventory, Barcodes) and integrated third-party APIs, ensuring reliable order processing and optimizing conversion rates. • Performance & UX: Technical overhaul and loading optimization (Core Web Vitals), resulting in significantly faster page load times. • Business Optimization: Automated critical workflows (Inventory management, Customer tracking) using robust PHP/Symfony solutions, improving internal team productivity.			
Permanent Contract Front-End Developer	Care-me	Chéraga, Algeria	10.2023-04-2024
• Designed intuitive and engaging user interfaces, contributing to an increase in user retention rates. • Developed dynamic front-end applications using Next.js, ensuring fully responsive and performance-optimized solutions. • Worked closely with the design team to enhance user experience (UX), significantly reducing user drop-off rates. • Designed and developed a secure REST API in C# .NET, integrating authentication and authorization mechanisms using JWT to ensure data protection and user access management. • Integrated a Machine Learning–based recommendation system, increasing user engagement through personalized content. • Applied agile methodologies (short sprints, continuous feedback), enabling reduced time-to-market and improved alignment with business needs.			

Projects

NextResume
• A web application that generates a CV by entering data into a form. The CV is created from a customizable template, providing an intuitive interface and a professional-looking result ready for printing or online sharing.
NovaStream
• A website inspired by YouTube, developed with React.js and an external API. It features video playback and a search function, all within a custom front-end interface that provides a fluid and modern user experience.
Snaply
• An Instagram-inspired web application built with Next.js. It includes user authentication, photo sharing, and real-time interactions using API Routes and Server-Side Rendering (SSR). The application can handle multiple users simultaneously and allows for interactive content sharing, offering a smooth and engaging user experience.

Education and Training

Digital School Of Paris Master 2, Data Engineer	94300 Vincennes France 10.2024-12.2025
USTHB Master 2, Bioinformatics	Bab Ezzouar 16111, Algeria 09.2021-07.2023
USTHB Bachelor's Degree in Information and Software Systems Engineering (ISIL)	Bab Ezzouar 16111, Algeria 09.2018-07.2021

Languages & Interests

- **Languages**: French (Fluent), English (Professional), Kabyle (Native), Arabic (Fluent)
- **Interests**: Cinema, anime, sports (bodybuilding, swimming)
